

ABOUT VHP

Virtual Health Partners (VHP) is an innovator in comprehensive, virtual care offering condition-specific live support for nutrition, lifestyle modification and fitness. Offered exclusively through networks of participating partners including insurers, hospital systems, physicians, corporations, pharmaceutical, medical device, fitness and nutrition companies, VHP's Business-to Business-to-Consumer (B2B2C) model provides a SaaS and PaaS solution that is scalable, and can be white labeled to fit partners' needs. Through the private, HIPAA compliant platform, VHP provides its partners with a turnkey solution for clients in the areas of weight loss and weight loss procedures, metabolic syndrome, oncology, women's health, digestive diseases, cardiac rehab, preventive medicine, plastic surgery and general wellness.

THE VHP DIFFERENCE

Condition-Specific:

We provide care across health verticals: weight loss, weight loss procedures, metabolic syndrome, oncology, women's health, digestive diseases, cardiac rehab, preventive medicine, plastic surgery and general wellness

Scalability:

Allows partners to expand beyond brick & mortar, and scalable package options enable a fixed cost rather than a variable cost for partners

Customizable Platform & Content:

Partners can use our content, their own content and they can white label the platform

Live Support:

Staffed by VHP or partner team members, end users get a human touch at all times
